

UNIT 5 Failure is Not an Option

Research one building or design by Le Corbusier, NOT the Ville Savoye, which we studied extensively.

List when the building was built and where.

Find THREE images of the building and explain in 3 sentences MINIMUM how each image fits with one of the 5 Points of Modern Architecture that we discussed at the beginning of the unit. See the “Ville Savoye Assignment” on my webpage www.aecidesign.com for the list of the 5 points if you do not remember them.

Download these images and insert them into a Word Document, and type up your explanations.

This will be worth 60% of the FNAO project.

The remaining 40% you will earn by writing **minimum 200 WORDS** describing the building in your own words, what you like or dislike about it, what you find interesting, etc. This should be in the same document as the image analysis above.

Complete this by Saturday at 3PM at the LATEST to earn credit. If it is not in my email design.aeci@gmail.com by 3PM on SATURDAY MAY 7, you cannot receive credit.
